

EPA TSCA Statement of Compliance

February 15th, 2024

Helgesen Industries is committed to complying with the Toxic Substances Control Act (TSCA), which is enforced by the United States Environmental Protection Agency (EPA).

We understand that TSCA is a critical regulation that ensures the safe use and management of chemicals in the United States. Our company recognizes the importance of protecting human health and the environment, and we are committed to implementing the necessary measures to comply with TSCA.

As part of our commitment to compliance with TSCA, we have established a comprehensive chemical management program that includes the following measures:

1. **Inventory Management:** We maintain an inventory of all the chemicals used in our operations and have developed a system to track their usage and disposal.
2. **Chemical Analysis:** We conduct regular chemical analysis to ensure that the chemicals used in our operations comply with TSCA regulations.
3. **Record-Keeping:** We maintain detailed records of all the chemicals used in our operations and their usage, storage, and disposal.
4. **Employee Training:** We provide regular training to our employees on the safe handling, storage, and disposal of chemicals.

We are committed to continuously reviewing and improving our chemical management program to ensure that we are always in compliance with TSCA and other applicable regulations.

Sincerely,

Karl Knutson – Director of Engineering and Quality
